DESIGN SKILLS

Long before I understood what exactly a graphic designer was, I knew that was what I wanted to be when I grew up. Well, now that I am a graphic designer, I'm not really sure if I would consider myself grown up. Regardless, design is still my passion, and every project I encounter sparks excitement.

Along with traditional print design, I also have experience with web design and illustration. Projects that I've completed range in variety from simple business cards, to entire book layouts. Please visit my website to view a brief variety of work that I have completed, and contact me as I would be more than happy to arrange for you to see more upon request.
